Discover a goldmine of 150+ free resources covering everything from APIs and hosting platforms to cheat sheets, icons, learning platforms, and more! Ready to turbocharge your development journey?

- **Traversy Media**: Provides tutorials on web development, programming languages, and frameworks.
- **The Net Ninja**: Offers tutorials on web development, JavaScript frameworks, and more.
- **Programming with Mosh**: Provides tutorials on programming languages, web development, and software engineering.
- **Academind**: Offers tutorials on web development, programming languages, and software engineering.
- **Codecademy**: Offers free interactive coding exercises.
- **Dev Ed**: Provides tutorials on web development and design.
- **The Coding Train**: Offers creative coding tutorials and challenges.
- **Derek Banas**: Provides tutorials on various programming languages and technologies.
- **Tech With Tim**: Offers tutorials on Python programming and game development.

Websites & Blogs:

- **MDN Web Docs**: Provides free documentation on web development technologies.

- **Smashing Magazine**: Offers articles and tutorials on web development and design.
- **A List Apart**: Provides articles on web design and development.
- **Stack Overflow Blog**: Offers insights and news related to programming and software development.
- **Hacker Noon**: Publishes articles on technology, programming, and startups.
- **GeeksforGeeks**: Offers tutorials and articles on web development, programming, algorithms, and data structures.
- **SitePoint**: Offers articles and tutorials on web development and design.

Free APIs:

- **JSONPlaceholder**: A free online REST API that you can use for testing and prototyping.
- **OpenWeatherMap API**: Provides weather data and forecasts.
- **REST Countries API**: Offers information about countries.
- **Random User Generator API**: Generates random user data.
- **NewsAPI**: Provides access to news articles from various sources.

- **NASA API**: Offers access to NASA data, including images, videos, and information about space missions.
- **The Dog API**: Provides random pictures of dogs.
- **OpenTriviaDB**: Offers trivia questions and answers.
- **Chuck Norris API**: Provides random Chuck Norris jokes.
- **VirusTotal API**: Analyze suspicious files and URLs for malware.
- **Google Maps Platform**: Offers APIs for embedding maps, route planning, location search, and geocoding into mobile apps.
- **Firebase**: A comprehensive development platform that provides features like authentication, real-time database, cloud messaging, and more.
- **GIPHY API**: Integrate GIFs and stickers into your applications.
- **OMDb API**: Access a database of movies and TV shows.
- **Mockaroo**: Allows you to generate large volumes of realistic test data in a variety of formats.
- **Faker**: A library for generating fake data, including names, addresses, and more.

Free Web Hosting Platforms:

- **GitHub Pages**: Host static websites for free.

Firestore.

- **Render**: Offers free hosting for web applications with automatic SSL and custom domains.
- **AWS Free Tier**: Provides limited free usage of various AWS services, including hosting.
- **Google Cloud Free Tier**: Offers free usage of Google Cloud Platform services, including hosting.
- **Glitch**: Offers free hosting for Node.js applications with collaborative editing.
- **InfinityFree**: Provides free web hosting with unlimited disk space and bandwidth.
- **Surge**: Static web publishing for front-end developers.
- **Supabase**: For building modern apps with a scalable backend.
- **Cyclic.sh**: Host your static sites with zero configuration.

Free Domain and SSL

- **Hostinger**: Hostinger offers affordable, reliable web hosting services with excellent customer support, a user-friendly interface, a *free* domain & SSL, and a designated CMS.

about any color and generates matching color palettes.

- **Adobe Color**: Create color schemes with the color wheel or browse thousands of color combinations from the Adobe Color community.
- **Canva**: An online design tool offering free templates.
- **Colormind**: A color scheme generator that uses deep learning to create cohesive color palettes.
- **Google Fonts**: Access a wide range of free fonts for web projects.
- **Font Awesome**: Offers free icons and icon fonts for use in projects.
- **FontSquirrel**: Hand-selected, high-quality, commercial-use free fonts.
- **DaFont**: Archive of freely downloadable fonts, including a variety of styles.
- **Fontjoy**: Generates font pairings to help you choose fonts that go well together.
- **1001FreeFonts**: Thousands of free fonts available for personal and commercial use.
- **FontFabric**: Provides high-quality free and premium fonts for designers.
- **Unsplash**: Provides high-quality free stock photos and illustrations.
- **Freepik**: Offers free vectors, photos, and illustrations.

- **Undraw**: Offers open-source illustrations for your projects.
- **BoxIcons**: Simple and beautiful open-source icons, carefully crafted for modern design trends.
- **Feather Icons**: A collection of simply beautiful open-source icons.
- **IcoFont**: A huge collection of 2100+ icons in a single font.
- **SVGRepo**: A repository of free SVG vectors and icons.
- **Iconmonstr**: Discover over 4000 free simple icons.

Cheat Sheets:

- **devhints.io**: Provides cheat sheets and quick reference guides for various programming languages and tools.
- **OverAPI**: Aggregates cheat sheets and quick references for programming languages, frameworks, and APIs.
- **Cheatography**: Offers user-generated cheat sheets for various topics, including programming and technology.
- **Git Tower**: Provides a comprehensive git cheat sheet.
- **Vim Cheat Sheet**: A quick reference guide for Vim commands.
- **Markdown Cheat Sheet**: A cheat sheet for Markdown syntax.

- **HTML & CSS Cheat Sheet**: A cheat sheet for HTML and CSS syntax.
- **JavaScript Cheat Sheet**: Handy reference for JavaScript syntax and concepts.
- **React Cheat Sheet**: Quick overview of React concepts and syntax.
- **SQL Cheat Sheet**: Comprehensive SQL commands and queries reference.

FREE Sites for HTML/CSS Templates

- **HTML5 UP**: Provides responsive HTML5 and CSS3 site templates.
- **FreeHTML5.co**: Offers free HTML5 templates for websites.
- **Templated**: Features a collection of free, creative HTML5 and CSS3 templates.
- **Start Bootstrap**: Provides free Bootstrap themes and templates.
- **One Page Love**: Offers free one-page website templates.
- **ThemeWagon**: A large collection of free HTML5 templates, including Bootstrap themes.
- **Colorlib**: Provides a variety of free HTML5 templates for different types of websites.
- **BootstrapMade**: Offers free Bootstrap templates for various niches.

- **Bootswatch**: Offers free, customizable themes for Bootstrap, making it easy to change the look and feel of your website.
- **HTMLRev**: A collection of free HTML templates and themes for personal and commercial use.

FREE JavaScript Animation Libraries

- **GreenSock Animation Platform (GSAP)**: A robust JavaScript library for high-performance animations.
- **Anime.js**: A lightweight JavaScript animation library with a simple API.
- **Velocity.js**: An animation engine with the same API as jQuery's `$.animate()`.
- **Three.js**: A JavaScript 3D library that makes WebGL simpler.
- **ScrollReveal**: Easily reveal elements as they enter the viewport.
- **Mo.js**: A motion graphics toolbelt for the web.
- **Lottie**: A library for rendering Adobe After Effects animations in real-time.
- **Popmotion**: A functional, flexible JavaScript motion library.
- **AOS (Animate On Scroll)**: A library to animate elements as you scroll down.

FREE Code Editors

- **Visual Studio Code**: A powerful, open-source code editor developed by Microsoft, featuring a wide range of extensions, a built-in terminal, and a rich ecosystem for debugging, syntax highlighting, and version control.
- **Atom**: A hackable text editor for the 21st century, created by GitHub. It offers a customizable interface and a plethora of plugins and themes to enhance the coding experience.
- **Brackets**: A modern, open-source text editor that understands web design. Developed by Adobe, it features live preview, preprocessor support, and an extensive plugin ecosystem.
- **Sublime Text**: A sophisticated text editor for code, markup, and prose. It offers a distraction-free writing environment, multiple selections, and a powerful command palette.
- **Notepad++**: A free source code editor and Notepad replacement that supports several languages. It's lightweight, fast, and comes with a host of features such as syntax highlighting and code folding.
- **Geany**: A lightweight, fast, and flexible code editor that provides basic IDE functions like code folding, syntax highlighting, and a built-in terminal emulator.
- **Vim**: A highly configurable text editor built to make creating and changing any kind of text very efficient. Vim is often praised for its
